2026 VEEFRIENDS TREASURE CHEST · H.E.R.O. AND STANDARD

# Character checklist

Every character in the product and every item it can appear on, built for character breaks on Whatnot and elsewhere. VeeFriends lists a 50-character roster; five more characters appear on stickers or comic covers and are included here. A dot means the character exists in that item. Rosters and print runs are from the official VeeFriends rarity guides; figures marked * are implied from those print runs and are not published by VeeFriends.

- **50 + 5** official roster, plus 5 others that appear
- **17 / 13** items per H.E.R.O. / Standard chest
- **7,500** chests (comic run, one per chest)
- **2,500*** H.E.R.O. chests implied
- **5,000*** Standard chests implied
- **18** Super Sticker inserts
- **Dec 9** Standard release; H.E.R.O. ships first

## Reading the numbers

- **Why 55 rows when VeeFriends says 50 characters.** VeeFriends' roster has 50 characters. This checklist adds five that are not on it but do appear in the product: Articulate Armadillo, who is in six sticker inserts, and the four characters who appear only on comic covers (Optimistic Otter, Practical Peacock, Positive Porcupine, Mikey & Anna).
- **Expected items per case** counts items, not value. It is the average number of that character's items in a sealed 10-chest case: 1 ÷ roster size for each guaranteed pack, the Super Insert Pack split by each insert's share of printed copies, and each comic cover by its share of the run. The columns add up to the 160 character items in a H.E.R.O. case and the 130 in a Standard case. The Scene Swap sticker in each H.E.R.O. chest is left out because it has no character.
- **Chest counts.** The comic run is 7,500 and every chest has one comic, so there are 7,500 chests. Scene Swap totals 2,500 and every H.E.R.O. chest has one, which leaves 5,000 Standard; VeeFriends has not published the split. The core sticker inserts are numbered to between 7,520 and 7,680 copies, a little more than one per chest. Print runs are the most that can exist; not every numbered copy will necessarily be pulled.
- **Robots.** VeeFriends' blog gives no print run for Robots. A VeeFriends employee said on a Whatnot stream that all 40 key characters are in it and each has a different print run, from 1/1 up to /40, with Genuine Giraffe at /26. That makes 820 Robots stickers in total. The 40 are taken to be the same 40 characters as Stick Figures. Which character has which run is not published, so the expected-items columns use /26 for Giraffe and an even split of the rest for the other 39.
- **Super Insert Pack.** With Robots, the seven Super Insert Pack inserts total 7,671 copies for 7,500 packs, a small surplus like the core inserts. Each insert's chance is its share of those copies.
- **Articulate Armadillo and Awesome African Civet.** The 50-character roster graphic shows Awesome African Civet, but the sticker insert graphics show Articulate Armadillo in six inserts and Civet in none. Civet appears only as a Classic pin. Both are listed.
- **Not published:** print runs for plated, silver and copper coins, for Classic, Evolution, Bullion Bars and Casted Comics pins, and for Comic Autographs; which Robots print run belongs to which character, apart from Giraffe; how gemstone pins and Super Insert Pack inserts are split between editions (assumed proportional here).
